

HQO QUALITY IMPROVEMENT PLAN 2023-2024

THEME	DIMENSION	INITIATIVE	METHOD	TARGET	Q4 RESULTS
Timely and Efficient Transitions	Efficient	Ensure that clients admitted to hospital for diagnoses related specifically to <u>heart, lung and GI</u> will have follow-up within seven days of discharge	<ul style="list-style-type: none"> Program-specific client experience survey for ACTT, Counselling & PHC to include question: 	<ul style="list-style-type: none"> 100% of clients have followed up within seven days of hospital discharge for selected conditions 	<ul style="list-style-type: none"> There were 16 Hospital Discharges for clients with one of the focus conditions (pneumonia, diabetes, stroke, gastrointestinal disease, congestive heart failure, chronic obstructive pulmonary disease, heart attack and other cardiac conditions) during Q3. Of these, 94% (15 discharges) had a post-hospital discharge encounter within 7 days.
Service Excellence	Patient-centered	Ensure that clients feel as involved as they want to be in decisions about their care and treatment	<ul style="list-style-type: none"> Program-specific client experience survey for ACTT, Counselling & PHC to include question: <i>“When you see your doctor or nurse practitioner, how often do they or someone else in the office involve you as much as you want to be in decisions about your care and treatment?”</i> <i>“Do you feel as involved as you would like in decisions about your care/treatment”</i> 	<ul style="list-style-type: none"> 80% of respondents report that they feel involved in decisions about the care they receive at Carlington 100% allied health partners delivering services at Carlington are aware of this component of the QIP and participate in the administration of the questionnaire. This will be covered by the designated manager as part of each allied partner’s orientation, upon joining Carlington. 	<ul style="list-style-type: none"> 95% of respondents in PHC responded “Always” or “Often”

HQO QUALITY IMPROVEMENT PLAN 2023-2024

THEME	DIMENSION	INITIATIVE	METHOD	TARGET	Q4 RESULTS
		<p>Ensure that clients enjoy a sense of feeling comfortable and welcome at CCHC, and this is reflected in client experience survey results</p> <p>Maintain or decrease the percentage of non-palliative patients newly dispensed an opioid within a 6-month reporting period prescribed by any provider in the health care system</p>	<ul style="list-style-type: none"> General client experience survey question: <i>“CCHC is a welcoming environment where I am treated with dignity and respect”</i> Calculation based on PS Suite chart entries for current medications for PHC clients without a problem list or assessment entry for palliative care. 	<ul style="list-style-type: none"> 90% of respondents report that <i>“CCHC is a welcoming environment where I am treated with dignity and respect”</i> Patients newly dispensed an opioid within a 6-month reporting period prescribed by any provider in the health care system over Patients/clients assigned (rostered and virtually rostered) to the organization for the specific reporting period. Exclude: Patients younger than 1 year of age Palliative care patients identified from hospital and physician billing claims data 	<ul style="list-style-type: none"> 93% of respondents in PHC responded “Always” or “Often” <ul style="list-style-type: none"> In the past 6 months (Oct 1 2023 to Mar 31 2024), 26 non-palliative clients have been prescribed an opioid. The total number of non-palliative clients seen by an MD or NP in the last 6 months, age 1 or over is 2272. So 1.1% of non-palliative clients seen by an MD or NP have been prescribed an opioid in the last 6 months.
Equity	Equitable Access to services for equity-deserving clients	Completion of sociodemographic data collection	<ul style="list-style-type: none"> Number of clients age 13 years and older who had an individual encounter with the CHC within the most recent 1-year period and who responded to at least one of the following four sociodemographic data questions: racial/ethnic 	<ul style="list-style-type: none"> 65%-100% of eligible clients completed at least one of the four specified sociodemographic questions. <p>Inclusions:</p> <ul style="list-style-type: none"> Clients age 13 years and older who had an 	<ul style="list-style-type: none"> Of the 3145 clients age 13 or over with an encounter in the last year, 2818 responded to at least 1 of the four sociodemographic data questions. This means we have racial/ethnic, disability, gender identity, or sexual orientation data
